**E**levate the vibes in your space with these truly immersive and lovable robots. Our art speaks to our passion for form, function and (ironically) human connection.

From Burning Man to Do Not Sit On The Furniture, our bots have become beloved attractions, lighting up myriad spaces around the country and connecting humans by sparking joy among party goers and art lovers alike.

First created in 2018, as a mammoth, static art installation for Burning Man, Byte has since grown into a renowned collective of extraordinary artists with a myriad of furry interactive installs and a massive mutant vehicle (art car).

Peruse our catalogue to get an idea of how we can transform your home or venue with any one of our existing or custom pieces! All sales help us to continue to bring the magic to Burning Man and you! So let's furry up!

Heaps of fluffin' good vibes!  
Jay Blanda
